

JUNE 2021 10 th -17 th	<u>New Moon 1st Quarter</u> Plant annual above ground leafy plants with seed outside the fruit	Annual lupins, cabbage, calendula, grain crops, lettuce, pansy, radicchio, spinach(English), spring onions, viola	<u>No planting 12 hours either side of New moon</u> In this quarter gravity pulls water up causing seeds to swell and burst. This with increasing light creates balanced leaf and root growth
2021 18 th -24 th	<u>New Moon 2nd quarter</u> Annuals with above ground yield which are vines and produce seeds inside the fruit	Annual lupins, calendula, grain crops, dwarf peas, pansy, spring onions, viola	Moonlight increasing creating strong leaf growth so is generally good for above ground leafy plant
2021 25 th -30 th	<u>Full Moon 3rd Quarter</u> Biennials, perennials, bulb and root crops Planted in one season to winter over and produce the following year. E.g. trees & shrubs	Asparagus, daylily, deciduous trees shrubs and vines, fig, herbaceous perennials, kiwi fruit, pecan, pistachio, potato, radish, rhubarb, turnip	<u>No planting 12 hours either side of the Full moon</u> Energy is drawing down creating more moisture in the soil and the moonlight is decreasing allowing for more energy to concentrate in the roots especially the 2 days after the full moon.
2021 1 st	<u>Full Moon 4th Quarter</u> No planting but a good time to cultivate, pull weeds and destroy pests.	No Planting, General Garden Maintenance Copyright © 2021 – 2031 Susan Anderson	Gravitational pull is at its lowest as is the moonlight and this is considered a resting period from planting.
